153rd O2k-Workshop on High-Resolution Respirometry: NextGen-O2k all-in-one demo

2022 Jul 01 – 02

Innsbruck, Tyrol, Austria

The **153rd O2k-Workshop on high-resolution respirometry (HRR)** is the **1st NextGen-O2k all-in-one demo**. We will provide an overview of the **NextGen-O2k**, with demo experiments of different applications and real-time analysis using **DatLab 8 (new)**.

O2k-Demo experiments demonstrate the unique advantages and limitations of simultaneous monitoring of oxygen concentration and flux (mitochondrial respiration) and either mitochondrial coenzyme Q redox state (Q-Module), NAD(P) redox state (NADH-Module), calcium uptake capacity, or ATP production (Fluo-Module with the fluorescent dyes Calcium Green or Magnesium Green). With the PB-Module, a demo experiment will show the advantages and limitations of monitoring oxygen concentration and flux related to photosynthesis. Different biological samples will be used, cryopreserved HEK 293T cells permeabilized with digitonin, isolated mitochondria from trout liver, and the green algae *Chlamydomonas reinhardtii*.

The **Blue Book** (5th edition) and the **Mitochondrial Physiology** provide a basic introduction to mitochondrial physiology, complemented by the links which can be found in the program.

Lecturers and tutors

Cardoso, Luiza	Mitochondrial Wizard, Oroboros Instruments (AT)
Cecatto, Cristiane	Mitochondrial Phoenix, Oroboros Instruments (AT)
Gnaiger Erich	Innovation Alchemist, CEO, Oroboros Instruments (AT)
Schmitt, Sabine	Mitochondrial Detective, Oroboros Instruments (AT)

Program

1 Friday, Jul 01

*printed in workshop materials

Demo	Weblink
13:00-13:15 Introduction: The NextGen-O2k, all-in-one	NextGen-O2k MiPNet26.13 NextGen-O2k manual
13:15-14:30 Coenzyme Q redox state, Q-Module demo experiment with permeabilized HEK 293T cells	MiPNet24.12 NextGen-O2k: Q-Module Komlodi BEC 2021*
14:30-15:00 <i>Coffee-break and discussion</i>	
15:00-16:00 NADH-Module demo experiment with fish liver isolated mitochondria	MiPNet26.12 NextGen-O2k: NADH-Module
16:00-17:00 PB-Module demo experiment with green algae <i>Chlamydomonas reinhardtii</i>	MiPNet26.11 NextGen-O2k: PB-Module Went MitoFit 2021*

2 Saturday, Jul 02

Demo	Weblink
09:00-10:30 Mitochondrial calcium uptake capacity measurement with Calcium Green (CaG) demo experiment with permeabilized HEK 293T cells	MitoPedia: Calcium Green Cecatto Bioblast 2022
10:30-11:00 <i>Coffee-break and discussion</i>	
11:00-12:30 Mitochondrial ATP production measurement with Magnesium Green (MgG) demo experiment with permeabilized HEK 293T cells	MiPNet26.10 MgG Cardoso BEC 2021*
12:30-13:00 <i>Final discussion</i>	

List of participants

Participant	Institution
Alvarez Diego F	Sam Houston State University (US)
Arandarcikaite Odeta	LT Kaunas Borutaite V - Lithuanian University of Health Sciences (LT)
Armas Diaz Yasmany	Polytechnic University of Marche (IT)
Awadhpersad Ryan	University of Helsinki (FI)
Boukalova Stepana	CZ Prague Neuzil J - Czech Academy of Sciences, CZ
Giampieri Francesca	Polytechnic University of Marche (IT)
Gnaiger Carolina	AT Innsbruck Oroboros - Oroboros Instruments, Innsbruck (AT)
Hand Steven C	US LA Baton Rouge Hand SC - Louisiana State University (US)
Irving Brian A	US LA Baton Rouge Irving BA - Louisiana State University (US)
Ivanovic Tijana	University Clinical Centre of Serbia (RS)
Iyer Shilpa	US AR Fayetteville Iyer S - University of Verona (IT)
Kolonic Attila	University of Physical Education, Budapest (HU)
Lakshmi pathi Vadlakonda	Kakatiya University (IN)
Laner Verena	AT Innsbruck Oroboros - Oroboros Instruments, Innsbruck (AT)
Lang Martin	Institute for Biomedicine, Eurac Research (IT)
Leo Elettra	DE Bremerhaven Mark FC - Alfred Wegener Institute for Polar and Marine Research (DE)
Moreno-Sanchez Rafael	AT Innsbruck Oroboros - Oroboros Instruments, Innsbruck (AT)
O'Boyle Nial	University of Nottingham (UK)
Pallotta Maria Luigia	University of Molise (IT)
Pavlovic Kasja	University Clinical Centre of Serbia (RS)
Pedrinolla Anna	University of Verona (IT)
Rocic Petra	Sam Houston State University (US)
Sumbalova Zuzana	SK Bratislava Sumbalova Z - Comenius University (SK)
Torres-Quesada Omar	University of Innsbruck (AT)
Yuan Taolin	Karolinska Institutet (SE)

NextGen O2k - Applications

Find solutions to

- Cancer
- Obesity
- Diabetes
- Aging
- Cardiovascular
- Neurodegeneration
- Exercise physiology
- Environmental physiology
- PhotoBiology
- Algal biotechnology

» explore

- O₂ consumption
- Q-redox state
- NAD(P)H redox state
- Oxygen dependence
- Hypoxia and O₂ kinetics
- H₂O₂ production
- mt-Membrane potential
- ATP production
- pH, Ca²⁺, NO⁻
- Photosynthesis
- Dark respiration
- Light-enhanced respiration

Oroboros - as a driving force in mitochondrial physiology - extends the analytical and diagnostic power of high-resolution respirometry by integration of NADH- and Q-redox monitoring in the **NextGen-O2k**. We aim at establishing the Oroboros quality control management for dissemination to our worldwide O2k-Network laboratories. This will become an effective contribution to address the acute *reproducibility crisis* of scientific investigation. In the spirit of Open Science and global networking, we will enable data sharing across projects and institutions in an Open Access database on mitochondrial physiology and pathology, to resolve the *inflation crisis* and ultimately the *value-impact crisis* of present academic publication. This will support key developments in mitochondrial medicine. In addition, we expand our business to algal biotechnology and ecology with the photobiology module of the NextGen-O2k, widening our focus from medicine to environment and climate.
